

3rd December 2018

Hackathon “Slavutych is the City of New Ideas”

The city of Slavutych always strives for better and innovative practices. Therefore, the Steering Committee of the 4th International Conference on Nuclear Decommissioning and Environmental Recovery, INUDECO (25-26th April 2019, Slavutych, Ukraine) holds the 3rd Hackaton “The City of New Ideas”.

The Goal of the Hackathon: 10 teams selected for participation (each team consisting of 4-5 members) will have to develop a ready-to-use formula or a prototype for the needs of the City of New Ideas within 24 hours during 24-25 April 2019. As early as *on April 26, 2019*, the teams will have to introduce the results of their work to the jury, hackaton mentors and INUDECO participants.

What are the City of New Ideas needs? These are the ideas aimed at making the city more livable for its residents through the introduction of innovations (such as energy saving, technology, transport, environment, open government, leadership, etc.). Anything that can improve the city’s daily life. Smart-solutions that would bring real benefits to citizens.

The main criterion in assessing the project is the problem-solving, the overall completeness and efficiency of the proposed solution; *it must be effective for a small city, and may also be extended to your hometown*. The winning project will receive a cash reward and (or) funding, provided it is implemented in Slavutych.

Preference will be given to projects that: are not "bicycles", but use worldwide experience and existing practices; use open data and services of the city; integrate or can be integrated into the existing city systems / city registries, complement and extend their functionality; are not complex solutions and solve one problem in one area.

We encourage the participation of developers, IT specialists and designers who are willing to contribute in the creation of services and mobile applications for the city; NGOs requiring IT assistance or expertise to improve their projects; IT companies with experience in developing and implementing Smart City projects and ready to share their experience; volunteers and activists.

Participation in the event is free of charge. The prize fund for the winning teams is envisaged. The registration for the Hakathon will be open from **01 February to 10 April 2019**. You can contact the Steering Committee by e-mail: inudeco2018@gmail.com, and by phone numbers: +38 (045-79) 22250, 21090, +38 0503531135.

Sincerely,

Anatolii Nosovskyi,
Co-chairman of the Program and Scientific
Organizing Committee,
Director of the Institute for Safety
Problems of NPPs of the National
Academy of Sciences of Ukraine

Yurii Fomichev,
Co-chairman of the Program and Scientific
Organizing Committee,
Slavutych City Mayor
