

1st February, 2018

Hackathon «Slavutych is the Town of New Ideas»

Since birth, the town Slavutych wants to be better and innovative, and the Organizing Committee of the Third International Conference on Nuclear Decommissioning and Environment Recovery - INUDECO supports the 2nd hackathon «Slavutych– the town of new ideas» as accompanying event in the scope of the Conference section - «Smart city technologies in the 21st century».

Hackathon's aim. 10 teams (about 3-5 persons) in 24 hours 25-26th April 2018, should develop a prototype of the product or service required for the Town of New Ideas.

What does Slavutych need? We need any idea or innovation that can make our town more comfortable for its citizens (energy saving, technology, transport, ecology, open government, leadership etc.). We need everything, which can make citizens' routine life better. And it should be a smart-solution that can benefit the townspeople.

The main criteria in projects evaluation will be the understanding of the real problem in the town, general perfection and capacity of proposed solution. *It have to work in Slavutych, and also can be widespread in your native town/city.* Project-winner will get financing for implementation in Slavutych.

We invite to take part developers, IT specialists and designers, which are ready for making services and applications for the town; public organizations, which need IT-help or expertise for improving their own projects; IT-companies, which have experience in development and implementation Smart City projects for telling about their experience; volunteers and activists.

Participation is free. There is a prize fund for teams-winners. The registration is open till **6 p.m. 10th April, 2018** on the official web-site of the conference <http://inudeco.pro/>
