

Dear colleagues!

The Sixth International Conference on Nuclear Decommissioning and Environmental Recovery INUDECO 2021 will be held within the Nationwide Programme of Events Dedicated to the 35th Anniversary of the Chornobyl Disaster, and will take place in Slavutych on 27-29 April 2021.

The conference will be held pursuant to the Decree of the President of Ukraine No. 556/2020 dated 9th December 2020 "On high priority efforts aimed at ensuring environmental safety, and preparation of events dedicated to the 35th anniversary of the Chronobyl disaster", in particular to consider the challenges and opportunities, enhance the efficiency of research and surveys, establish cooperation and exchange experience in the area of nuclear facilities decommissioning and management of radioactive waste and spent nuclear fuel.

Due to the worldwide situation connected with the COVID-19 pandemic, the 2021 INUDECO conference will be held both in-person and remotely. Participants are offered to choose the best participation format by themselves and to decide upon which one is safe for their health.

The annual INUDECO conference has been held in Slavutych (Ukraine) since 2016 as part of the events dedicated to the anniversary of the Chornobyl accident. Over this time, more than 500 academics and practitioners from Denmark, Belarus, Germany, Poland, the Russian Federation, Spain, Norway, the United States of America, Ukraine, France, the Czech Republic, and Japan took part in the conference which is organized in the youngest Ukrainian city of Slavutych.

The Conference is organized by the Executive Committee of the Slavutych City Council of Vyshhorod raion, Municipal Enterprise "Regional Development Agency" of the Slavutych City Council, the State Agency of Ukraine for Exclusion Zone Management, State Specialized Enterprise "Chornobyl NPP", Institute for NPP Safety Problems of the National Academy of Science of Ukraine, Institute of Mathematical Machines & Systems Problems, and Slavutych branch of the National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute".

In the context of man-made disasters which took place in Chornobyl (1986, Ukraine) and Fukushima (2011, Japan), and the COVID-19 pandemic, new challenges come to a brand new level as well, such as in particular the reintegration of territories, social adaptation of people, and the legacy we leave behind for the next generations.

The INUDECO Steering Committee announces the following Programme of the conference and topics for open discussions:

- |                     |   |
|---------------------|---|
| <b>26<br/>April</b> | <b>Meeting</b> veterans of Ukraine's atomic energy industry in a round-table format<br>Local museum of the Slavutych and ChNPP history,<br>moderated by the Municipal Enterprise "Regional Development Agency" of Slavutych   |
